

Codesauce.co

Codesauce.co will act as portfolio site that showcases my development projects, design work, and code samples. The site will also house my resume and blog.

Codesauce.co will provide a space for me to upload and showcase my work. The landing page will provide a brief description of my skills, an overview of my work and contact info. The project page will include 2 galleries one will contain my software development projects and the other will display my design work. The site will also include a link to my technical blog and resume.

Recruiters

- Get an overview of my work
- Quickly obtain my resume and contact info

Developers

- View my projects
- Read my blog
- Send me emails about my incorrect opinions
